| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                            |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | The GENLISA Human B-Cell Lymphoma / Leukemia 11B (BCL11B) ELISA includes features like: Ready to use protocol with break-apart wells for ease of use Standardisation and High Reproducibility Lot to Lot Consistency Accuracy and Precision Validated again... |
| Detektionsbereich        | 78.125 - 5000 pg/ml                                                                                                                                                                                                                                            |
| Sensitivitaet            | 39 pg/ml                                                                                                                                                                                                                                                       |
| Proben                   | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                             |
| Anwendungsbeschreibung   | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                     |
