| Immunogen                | Recombinant full-length human Thyroglobulin protein                                                                                                                                                                                                           |
| Konjugation              | CF 740                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Thyroglobulin is a 660 kDa dimeric pre-protein with multiple glycosylation sites. It is produced by and processed within the thyroid gland to produce the hormone thyroxine and triiodothyronine. Prior to forming dimers, thyroglobulin monomers undergo ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |
