| Immunogen                | Recombinant human LMO2 protein fragment (around aa 23-140) (exact sequence is proprietary)                                                                                                                                                                    |
| Konjugation              | CF 740                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | The LMO2 protein has a central and crucial role in hematopoietic development and is highly conserved. It has a particular function in normal and lymphatic endothelial cells involving the regulation of angiogenesis and lymph-angiogenesis. Immunohistoc... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.1 mg/mL                                                                                                                                                                                                                                                     |

|                  |                             |
