| Kategorie                | Antikörper                                                                           |
| Immunogen                | Recombinant mouse IFNgamma                                                           |
| Klonalität               | Recombinant                                                                          |
| Konzentration            | Lot specific,typically between 4-11 mg/ml                                            |
| Klon-Bezeichnung         | [XMG1.2-CP058]                                                                       |
| Molekulargewicht         | 150 kDa                                                                              |
| Pubmed                   | <a href=https://pubmed.ncbi.nlm.nih.gov/38486021 target=_blank rel=nofollow>38486021 |
| Reinheit                 | 95% , Determined by SDS-PAGE                                                         |
| Formel                   | PBS, pH 7.0, Contains no stabilizers or preservatives                                |
| Target-Kategorie         | IFNgamma                                                                             |

|                        |                                                                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Flow Cytometry, Western Blot , ELISPOT, in vitro IFNgamma neutralization, in vivo IFNgamma neutralization , *Reported for the original XMG1.2 antibody |
