### Recombinant Almond Pru du 4 Protein RAY-230-00892-200

|                          |                                                                              |
|--------------------------|------------------------------------------------------------------------------|
| Artikelname              | Recombinant Almond Pru du 4 Protein                                          |
| Artikelnummer            | RAY-230-00892-200                                                            |
| Hersteller Artikelnummer | 230-00892-200                                                                |
| Alternativnummer         | RAY-230-00892-200                                                            |
| Hersteller               | RayBiotech                                                                   |
| Kategorie                | Proteine/Peptide                                                             |
| Spezies Reaktivität      | Plant                                                                        |
| Produktbeschreibung      | Recombinant almond Pru du 4 derived from E.coli...                           |
| Konzentration            | Determined by Bio-Rad protein assay dye reagent concentrate.                 |
| Molekulargewicht         | 14 kDa                                                                       |
| Tag                      | His                                                                          |
| Expression System        | E. coli                                                                      |
| Reinheit                 | SDS-PAGE under reducing conditions and visualized by Coomassie blue staining |
| Formulierung             | Lyophilized powder                                                           |
| Sequenz                  | Ser2-Leu131                                                                  |
| Formel                   | Lyophilized from a 0.45 µm filtered solution in 1x PBS (pH 7.4).             |

|                        |                                                                                                                                                               |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Briefly spin the vial and bring the contents to the bottom prior to opening. It is recommended to reconstitute at 0.5~1.0 mg/mL with sterile deionized water. |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
