| Hersteller               | RayBiotech                                                                                                                                                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                |
| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Recombinant mouse angiotensin-converting enzyme 2 (ACE2) with C-terminal his-tag, derived from the transfected human HEK293 cells....                                                                                                                           |
| Konzentration            | Lot specific (see the label on the vial), determined by BCA protein assay                                                                                                                                                                                       |
| Molekulargewicht         | Recombinant protein product has a calculated molecular mass of 80 kDa. Due to the abundant glycosylation, it migrates as approximately 90 kDa protein bands in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions. After deglycosylation under native |
| Tag                      | His                                                                                                                                                                                                                                                             |
| Expression System        | HEK293 cells                                                                                                                                                                                                                                                    |
| Reinheit                 | SDS-PAGE under reducing conditions and visualized by Coomassie blue staining                                                                                                                                                                                    |

|              |                                                        |
|--------------|--------------------------------------------------------|
| Formulierung | Liquid                                                 |
| Sequenz      | Gln18-Thr740 (Extracellular domain)                    |
| Formel       | Supplied as a 0.2 µm filtered solution in PBS (pH 7.4) |
