| Alternativnummer         | RAY-255-10076-1                                                                                                                                                                                                                                                 |
| Hersteller               | RayBiotech                                                                                                                                                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Highly purified, microbial (non-mammalian) RNase prepared with non-animal components. Supplied as a solution in 2.8 M ammonium sulfate....                                                                                                                      |
| Molekulargewicht         | Molecular Weight11 kDa (Egami et al. 1964)                                                                                                                                                                                                                      |
| Expression System        | Aspergillus oryzae                                                                                                                                                                                                                                              |
| Application Verdünnung   | Cleavage enzyme for the determination of structure, nearest neighbor frequencies, and sequence of RNA (Miura and Egami 1960, Rushizky and Sober 1962, Miura 1964b, Holley et al. 1965, Madison and Kung 1967, and Neelon et al. 1967) Preparation of nucleoside |
