| Hersteller Artikelnummer | CoV-SM1ACE2-2                                                                                                                                                                                                                                                 |
| Alternativnummer         | RAY-COV-SM1ACE2-2                                                                                                                                                                                                                                             |
| Hersteller               | RayBiotech                                                                                                                                                                                                                                                    |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Human, Virus                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | The RayBio COVID-19 Spike Variant-ACE2 binding assay kits are a rapid, simple, and sensitive method to characterize the binding affinity of the SARS-CoV-2 Spike (S) protein variants and the Angiotensin I Converting Enzyme 2 (ACE2) receptor complex in... |
| Formulierung             | 96-well Microplate                                                                                                                                                                                                                                            |
| Proben                   | Plasma, Serum, Antibodies, Proteins, Small Molecules, Peptides                                                                                                                                                                                                |
| Target-Kategorie         | ACE2, Spike Protein                                                                                                                                                                                                                                           |
| Anwendungsbeschreibung   | Colorimetric                                                                                                                                                                                                                                                  |
