| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Artemin (ARTN) is a member of glial cell line-derived neurotrophic factor (GDNF) family of ligands, and its signaling is mediated via a multi-component receptor complex including the glycosylphosphatidylinositol-anchored GDNF family receptors a (GFRa... |
| Molekulargewicht         | 39.3 kDa (predicted). Due to glycosylation, the protein migrates to 48-52 kDa based on Tris-Bis PAGE result.                                                                                                                                                  |
| Reinheit                 | >95%                                                                                                                                                                                                                                                          |
