| Kategorie                | Biochemikalien                                                                                                                                                                                                             |
| Produktbeschreibung      | SIRP beta 1 isoform 3 Protein, Human, Recombinant (His & Avi), Biotinylated is expressed in HEK293 mammalian cells with C-His-Avi tag. The predicted molecular weight is 39.9 kDa and the accession number is Q5TFQ8-1.... |
| Molekulargewicht         | 39.9 kDa (predicted). Due to glycosylation, the protein migrates to 55-68 kDa based on Tris-Bis PAGE result.                                                                                                               |
