| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                |
| Produktbeschreibung      | Beta-klotho (KLB) is a coreceptor required for endocrine fibroblast growth factor (FGF) 15/19 and FGF21 signaling in the brain. Klb is prominent within the hypothalamus, which is consistent with its metabolic functions, but diverse roles for Klb are ... |
| Molekulargewicht         | 111.6 kDa (predicted). Due to glycosylation, the protein migrates to 115-130 kDa based on Tris-Bis PAGE result.                                                                                                                                               |
