| Immunogen                | Full length human TCF7, aa1-384 (NP_003193.2).                                                                                                                                                                                                                |
| Produktbeschreibung      | The T cell specific transcription factor TCF7 activates genes involved in immune regulation and thymocyte differentiation, and is a candidate locus for genetic susceptibility to type 1 diabetes. Applications: Suitable for use in Western Blot. Other a... |
| NCBI                     | <a href="#">003202</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Purified by Protein A affinity chromatography.                                                                                                                                                                                                                |
| Formulierung             | Supplied as a liquid in PBS, pH 7.2.                                                                                                                                                                                                                          |
