## Product Datasheet

### **PAK2, NT (Serine/Threonine-protein Kinase PAK 2, Gamma-PAK, PAK65, S6/H4 Kinase, p21-activated Kinase 2, PAK-2, p58), Rabbit USB-146112**

|                          |                                                                                                                                                                                                                                                               |

| Alternativnummer         | USB-146112-100                                                                                                                                                                                                                                                |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IF, IHC, WB                                                                                                                                                                                                                                            |
| Immunogen                | Synthetic peptide corresponding to 14aa from near the N-terminus of human PAK2.                                                                                                                                                                               |
| Produktbeschreibung      | The p21-activated kinases (PAKs) are serine-threonine kinases that bind to the active forms of Cdc42 and Rac. They are divided into two groups, the first of which include PAK1, 2 and 3, and can be activated by Cdc42/Rac binding. Group 1 PAKs contain ... |
| Reinheit                 | Purified by immunoaffinity chromatography.                                                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in PBS, 0.02% sodium azide.                                                                                                                                                                                                              |
