| Produktbeschreibung      | Inhibition of trypsin. Source: Recombinant protein corresponding to aa1-172 from erythrina caffra, fused to His-Tag at N-terminal, expressed in Yeast. Molecular Weight: ~21.3kD Amino Acid Sequence:<br>VLLDGNGEVVQNGGTYLLPQVWAQGGGVQLAKTGEETCPLTVVQSPNELS.<br>.. |
| Molekulargewicht         | 21.3                                                                                                                                                                                                                                                               |
| UniProt                  | <a href="#">P09943</a>                                                                                                                                                                                                                                             |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                                     |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                                 |
