| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | CD320, also known as CD320 antigen isoform 1, belongs to the low-density lipoprotein receptor family, with 2 low-density lipoprotein receptor type A domains separated by a complement-like cysteine-rich region. It binds TC-cobalamin (Cbl) and internal... |
| Molekulargewicht         | 47.4                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">057663</a>                                                                                                                                                                                                                                        |
| Reinheit                 | ~90% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in PBS, pH 7.4, 10% glycerol.                                                                                                                                                                                                            |
