| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | SH2D1B, also known as SH2 domain-containing protein 1B, is one of the proteins which activate NK cells. It plays a role in controlling signal transduction through at least four receptors, CD84, SLAMF1, LY9 and CD244, expressed on the surface of profe... |
| Molekulargewicht         | 16.4                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">444512</a>                                                                                                                                                                                                                                        |
| Reinheit                 | ~90% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in PBS, pH 7.4, 20% glycerol.                                                                                                                                                                                                            |
