| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | SRSF1, also known as Serine/arginine-rich splicing factor 1, is a member of the arginine/serine-rich splicing factor protein family, and functions in both constitutive and alternative pre-mRNA splicing. This protein binds to pre-mRNA transcripts and ... |
| Molekulargewicht         | 28.5                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">008855</a>                                                                                                                                                                                                                                        |
| Reinheit                 | ~95% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 20mM Tris-HCl, pH 8.5, 1mM DTT, 0.2mM EDTA, 100M potassium chloride, 40% glycerol.                                                                                                                                                    |
