| Immunogen                | IL-2-dependent BALB/c mouse helper T-cell clone HT-2                                                                                                                                                                                                          |
| Produktbeschreibung      | CD25 is a 55kD glycoprotein, also known as the low affinity IL-2Ra, Ly-43, p55, or Tac. It is expressed on activated T and B cells, thymocyte subset, pre-B cells, and T regulatory cells. In association with CD122 (IL-2Rb) and CD132 (common g chain), ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [3C7]                                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">P01590</a>                                                                                                                                                                                                                                        |
| Reinheit                 | Purified by affinity chromatography.                                                                                                                                                                                                                          |

|              |                                                          |
|--------------|----------------------------------------------------------|
| Formulierung | Supplied as a liquid in PBS, pH 7.2, 0.09% sodium azide. |
