| Produktbeschreibung      | Biotin-labeled Nucleotides are used for non-fluorescent labeling of nucleic acids in purification and detection applications. Applications: Suitable for use in DNA labeling by PCR with taq polymerase, DNA labeling by nick translation with DNase I, DN... |
| Molekulargewicht         | 862.67                                                                                                                                                                                                                                                        |
| Reinheit                 | 95% (by HPLC)                                                                                                                                                                                                                                                 |
| Formulierung             | Supplied as a sterile liquid in 10mM Tris-HCl, pH 7.5. Labeled with Biotin.                                                                                                                                                                                   |
