## Product Datasheet

**EphB3 (EPH receptor B3, Ephrin type-B receptor 3 precursor, ETK2, Hek2, HEK2, Tyro6, TYRO6, Tyrosine-protein kinase receptor HEK-2), IgG2a, Clone: [9H115], Mouse, Monoclonal USB-E3372-01C**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Immunogen                | NS0-derived, recombinant mouse EphB3 extracellular domain aa30-554, P54754.                                                                                                                                                                                   |
| Produktbeschreibung      | EphB3, also known as Mdk5, Hek2, or Sek4, is a 993 amino acid (aa), 110kD member of the Eph family of tyrosine kinase receptors, which engage in bidirectional signaling with members of the ephrin transmembrane ligand family. EphB3 engages ephrin B li... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [9H115]                                                                                                                                                                                                                                                       |
| Isotyp                   | IgG2a                                                                                                                                                                                                                                                         |

|              |                                                                                                  |
|--------------|--------------------------------------------------------------------------------------------------|
| UniProt      | <a href="#">P54754</a>                                                                           |
| Reinheit     | Purified by Protein G affinity chromatography.                                                   |
| Formulierung | Supplied as a lyophilized powder from PBS, 5% trehalose.<br>Reconstitute with 200ul sterile PBS. |
