| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Extensively purified glucose-6-phosphate dehydrogenases have been obtained from yeasts, E. coli and various mammalian tissues, and these are generally considered to be coenzyme specific for NADP. Source: Leuconostoc mesenteroides Form: Supplied as a ... |
| Reinheit                 | Activity: 200 NADP units per mg protein                                                                                                                                                                                                                       |
| Formulierung             | Supplied as a suspension in 3.7M ammonium sulfate.                                                                                                                                                                                                            |
