## Product Datasheet

### **IkB alpha (NF-kappa-B Inhibitor alpha, I-kappa-B-alpha, IkB-alpha, IkappaBalpa, Major Histocompatibility Complex Enhancer-binding Protein MAD3, NFKBIA, IKBA, MAD3, NFKBI), Rabbit USB-I2500-01R**

|                          |                                                                                                                                                                                                                                                               |

| Artikelname              | IkB alpha (NF-kappa-B Inhibitor alpha, I-kappa-B-alpha, IkB-alpha, IkappaBalpa, Major Histocompatibility Complex Enhancer-binding Protein MAD3, NFKBIA, IKBA, MAD3, NFKBI), Rabbit                                                                            |
| Artikelnummer            | USB-I2500-01R                                                                                                                                                                                                                                                 |
| Hersteller Artikelnummer | I2500-01R                                                                                                                                                                                                                                                     |
| Alternativnummer         | USB-I2500-01R-50                                                                                                                                                                                                                                              |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, IHC, WB                                                                                                                                                                                                                                                |
| Immunogen                | Synthetic non-phosphopeptide corresponding to human IkB alpha around the phosphorylation site of serine 32/36 (H-D-SP-G-L- D-SP -M-K).                                                                                                                        |
| Produktbeschreibung      | Three major forms of IKB like molecules have been identified and each is characterised by multiple copies of ankyrin repeats. IKB alpha and IKB beta appear to be the major regulatory forms of IKB in most cells. These proteins interact with p65 or cRe... |
| Reinheit                 | Purified by immunoaffinity chromatography.                                                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in PBS (without Mg <sup>2+</sup> and Ca <sup>2+</sup> ), pH 7.4, 0.02% sodium azide, 50% glycerol.                                                                                                                                       |
