| Immunogen                | Purified rat brain microtubules MAP2.                                                                                                                                                                                                                         |
| Produktbeschreibung      | MAP2 is a type II microtubule associated protein (MAP). It is located predominately in dendrites where it accelerates tubulin polymerization, cross-links microtubule fibers into stable bundles, and connects microtubule filaments to intermediate filam... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [0.T.88 5F9]                                                                                                                                                                                                                                                  |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |
