| Alternativnummer         | USB-N5380-30A-50                                                                                                                                                                                                                                              |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IF                                                                                                                                                                                                                                                            |
| Immunogen                | Synthetic non-phosphopeptide corresponding to mouse NMDAR2B around the phosphorylation site of tyrosine 1472 (H-V-YP-E-K).                                                                                                                                    |
| Produktbeschreibung      | NMDA receptors are a class of ionotropic glutamate receptors. NMDA receptor channel has been shown to be involved in long term potentiation, an activity dependent increase in the efficiency of synaptic transmission thought to underlie certain kinds o... |
| Reinheit                 | Purified by immunoaffinity chromatography.                                                                                                                                                                                                                    |
| Formulierung             | Supplied as a liquid in PBS (without Mg <sup>2+</sup> and Ca <sup>2+</sup> ), pH 7.4, 150mM sodium chloride, 0.02% sodium azide, 50% glycerol.                                                                                                                |
