| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | Protein Kinase C (PKC), one of the most important proteins in signal transduction is involved with cell proliferation, differentiation and function. PKC is a family of Ca++ phosphatidylserine dependent, serine/threonine kinases with 12 known isozyme ... |
| Formulierung             | Suspended in SDS/mercaptoethanol sample buffer with a bromophenol blue dye marker.                                                                                                                                                                            |
