| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Each kit contains 20 individual 10-mer primers (supplied at a minimum amount of 50 nmole per primer). These primers are suitable for use in genetic mapping and DNA fingerprinting. In the RAPD technique, a single 10mer of arbitrary sequence is used as... |
| Reinheit                 | Salt-free                                                                                                                                                                                                                                                     |
| Formulierung             | Each primer is supplied as a lyophilized powder. Salt Free. Reconstitute with sterile dH2O, TE or Tris pH 7.0.                                                                                                                                                |
