| Produktbeschreibung      | Broad spectrum beta-lactamase which confers resistance to penicillins, as well as first, second and third-generation cephalosporins. Source: Recombinant protein corresponding to aa29-291 of E. coli Beta-Lactamase CTX-M-1, fused to 6xHis-Tag at C-term... |
| Molekulargewicht         | 30.2                                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P28585</a>                                                                                                                                                                                                                                        |
| Reinheit                 | 85% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
