| Produktbeschreibung      | Horseradish peroxidase (HRP) is a 40kD protein that catalyzes the oxidation of substrates by hydrogen peroxide, resulting in a colored or fluorescent product or release of light as a byproduct of the reaction. It is most commonly used for blotting, i... |
| Reinheit                 | Highly Purified                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 10mM HEPES, 150mM NaCl, 0.1mM Ions, 0.02% thimerosal. Labeled with horseradish peroxidase (HRP).                                                                                                                                      |
