| Kategorie                | Biochemikalien                                                                                                                                                                                                                                                |
| Produktbeschreibung      | 7-Deaza-2'-deoxyguanosine 5'-triphosphate enhances polymerase chain reaction (PCR) product yield. G residues can form secondary structures which are not fully denatured during electrophoresis. This can lead to sequence ambiguities. 7-Deaza-G doesn't ... |
| Molekulargewicht         | 506.19                                                                                                                                                                                                                                                        |
