| Produktbeschreibung      | Alphasynuclein is a neuronal protein that plays several roles in synaptic activity such as regulation of synaptic vesicle trafficking and subsequent neurotransmitter release. It acts also as a molecular chaperone in its multimeric membranebound state... |
| Molekulargewicht         | 14.5 kDa                                                                                                                                                                                                                                                      |
| Tag                      | Native                                                                                                                                                                                                                                                        |
| NCBI                     | <a href="#">37840</a>                                                                                                                                                                                                                                         |
| Puffer                   | 50mM HEPES, 100mM NaCl, pH8.0                                                                                                                                                                                                                                 |
| Expression System        | Met 1 - Ala 140                                                                                                                                                                                                                                               |
