| Produktbeschreibung      | The monoclonal antibody mAb729 reacts with the human CC chemokine receptor, CCR7. The protein encoded by this gene is a member of the G proteincoupled receptor family. This receptor was identified as a gene induced by the EpsteinBarr virus (EBV),and ... |
| Molekulargewicht         | 58.9 kDa                                                                                                                                                                                                                                                      |
