| Produktbeschreibung      | TDP43, the transactive response (TAR)DNA binding Protein with a molecular weight of 43 kDa is encoded by TARDBP gene that located at the chromosome 1. It is a RNA/DNA binding protein that structurally resembles a typical hnRNP protein family member. ... |
| Molekulargewicht         | 46.8 kDa                                                                                                                                                                                                                                                      |
| Tag                      | N-10*His                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">13148</a>                                                                                                                                                                                                                                         |
| Puffer                   | 50 mM HEPES, 500 mM NaCl, 0.4 M Arginine, pH8.0                                                                                                                                                                                                               |
