## Product Datasheet

### **Human ALPG / ALPPL2 Protein, His Tag (active enzyme, MALS verified), Unconjugated ABS-ALG-H52H9-1MG**

|                          |                                                                                                                                                                                                                                                               |

| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | ALPPL2 is specifically highly expressed in naive pluripotent stem cells. Moreover, in naive state somatic cell reprogramming, naiveprimed transformation and other systems, the use of the ALPPL2 promoterdriven fluorescent reporter system can specifica... |
| Molekulargewicht         | 54.5 kDa                                                                                                                                                                                                                                                      |
| Tag                      | C-10*His                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">10696</a>                                                                                                                                                                                                                                         |
| Puffer                   | 20 mM Tris, 150 mM NaCl, pH7.5                                                                                                                                                                                                                                |
| Expression System        | Ile 20 - Asp 503                                                                                                                                                                                                                                              |
