| Produktbeschreibung      | CD16 is a low affinity Fc receptor, and has been identified as Fc receptors FcgammaRIIIa (CD16a) and FcgammaRIIIb (CD16b). These receptors bind to the Fc portion of IgG antibodies. CD16 encoded by two different highly homologous genes in a cell types... |
| Molekulargewicht         | 23.7 kDa                                                                                                                                                                                                                                                      |
