| Produktbeschreibung      | Biotinylated SARSCoV2 Spike Trimer, His,Avitag (SPNC82Ec) is expressed from human 293 cells (HEK293). It contains AA Val 16 Pro 1213 (Accession QHD43416.1). The mutations (T19R, G142D, EF156157del, R158G, L452R, T478K, D614G, P681R, D950N) were iden... |
| Molekulargewicht         | 139.5 kDa                                                                                                                                                                                                                                                    |
| Tag                      | C-10*His & C-Avi                                                                                                                                                                                                                                             |
| NCBI                     | <a href="#">43416</a>                                                                                                                                                                                                                                        |

|                   |                             |
|-------------------|-----------------------------|
| Puffer            | 0.1 M Sodium citrate, pH5.5 |
| Expression System | Val 16 - Pro 1213           |
| Reinheit          | 95%                         |
| Formulierung      | Powder                      |
| Target-Kategorie  | Spike protein               |
