| Produktbeschreibung      | The spike protein is a large type I transmembrane protein containing two subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which is responsible for recognizing the cell surface receptor. S2 contains basic elements needed for th... |
| Molekulargewicht         | 136.3 kDa                                                                                                                                                                                                                                                     |
| Tag                      | C-10*His                                                                                                                                                                                                                                                      |
