Anwendungsbeschreibung

Application Notes: This protein carries a polyhistidine tag at the C-terminus. This protein undergoes autocatalytic cleavage to release the pro-peptide and mature chain. The pro-peptide and mature chain are associated through non-covalent interactions and with a calculated MW of 13.9 kDa and 59.4 kDa respectively. The protein migrates as 17 kDa and 60-66 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation
