Product Datasheet

Sepharose Protein A BYT-ORB348753

Artikelname	Sepharose Protein A
Artikelnummer	BYT-ORB348753
Hersteller Artikelnummer	orb348753
Alternativnummer	BYT-ORB348753-2
Hersteller	Biorbyt
Kategorie	Proteine/Peptide
Applikation	IP
Konjugation	Sepharose
Produktbeschreibung	Sepharose Protein A...
Konzentration	6.0 mg/cc
UniProt	P38507
Puffer	None
Reinheit	Protein A has a high affinity for the Fc regions of IgG molecules from a variety of species, including human, mouse, rat IgG2c, cow IgG2c, goat IgG2, sheep IgG2, and rabbit. Immobilization of protein A creates an affinity resin that can be used to isolate IgG fractions from crude serum, ascites fluid or hybridoma supernatants/dilute cell cultures. High capacity and high flow rate fractionation is applicable to both laboratory and scale-up processes. Sepharose Protein A can be used for immunoprecipitation and purification of monoclonal antibodies.

Formulierung	Suspension of agarose beads
Application Verdünnung	IP: User Optimized
Anwendungsbeschreibung	Application Notes: Protein A resin may also be used to pull down antibody:antigen complexes in immunoprecipitation experiments. This product is suitable for use at 20 µL per immunoprecipitation reaction
