| Hersteller               | Biorbyt                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                             |
| Spezies Reaktivität      | Human                                                                                                                        |
| Konjugation              | Unconjugated                                                                                                                 |
| Produktbeschreibung      | Human IGFBP-7, His Tag is expressed from human 293 cells (HEK293). It contains AA Asp 30 - Leu 282 (Accession NP_001544).... |
| Molekulargewicht         | 27.0 kDa                                                                                                                     |
| NCBI                     | <a href="#">001544</a>                                                                                                       |
| UniProt                  | <a href="#">Q16270</a>                                                                                                       |
| Puffer                   | PBS, pH 7.4                                                                                                                  |
| Quelle                   | Human                                                                                                                        |
| Reinheit                 | 95%                                                                                                                          |
| Formulierung             | Powder                                                                                                                       |
| Sequenz                  | NP_001544                                                                                                                    |

|                        |                                                                                                                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | IGFBP-7                                                                                                                                                                                                                    |
| Anwendungsbeschreibung | Application Notes: This protein carries a polyhistidine tag at the N-terminus. The protein has a calculated MW of 27.0 kDa. The protein migrates as 33-35 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation |
