| Produktbeschreibung      | This Recombinant Crimean-Congo hemorrhagic fever virus Envelope glycoprotein (GP), partial-VLPs spans the amino acid sequence from region 995-1684aa. Purity: The purity information is not available for VLPs proteins.... |
| Molekulargewicht         | 79.3 kDa                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">Q8JSZ3</a>                                                                                                                                                                                                      |
| Puffer                   | Lyophilized from a 0.2 µm sterile filtered PBS, 6% Trehalose, pH 7.4.                                                                                                                                                       |
| Quelle                   | Crimean-Congo hemorrhagic fever virus (strain Nigeria/IbAr10200/1970) (CCHFV)                                                                                                                                               |
| Reinheit                 | The purity information is not available for VLPs proteins.                                                                                                                                                                  |
| Formulierung             | Lyophilized powder                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Anwendungsbeschreibung | <p>Biological Origin: Crimean-Congo hemorrhagic fever virus (strain Nigeria/IbAr10200/1970) (CCHFV). Application Notes: We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. Aliquot for long-term storage at -80°C. Solubilize for 60 minutes at room temperature with occasional gentle mixing. Avoid vigorous shaking or vortexing</p> |
