| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                                 |
| Produktbeschreibung      | This Human coronavirus NL63 Nucleo protein spans the amino acid sequence from region 1-377aa. Purity: Greater than 85% as determined by SDS-PAGE....                                                                                                                             |
| Molekulargewicht         | 46.3 kDa                                                                                                                                                                                                                                                                         |
| UniProt                  | <a href="#">Q6Q1R8</a>                                                                                                                                                                                                                                                           |
| Puffer                   | Lyophilized from Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                                                                                                     |

|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Biological Origin: Human coronavirus NL63 (HCoV-NL63). Application Notes: We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference |
