| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | TIMP-1 is an inducible glycoprotein, which is synthesized by many different cell types. TIMP-1 binds in a reversible fashion to matrix metalloproteinases, with regions in the Nterminal domain binding to the MMP substrate-binding site. TIMP-1 also fun... |
| Molekulargewicht         | 25.21 kDa                                                                                                                                                                                                                                                     |
