| Produktbeschreibung      | This Recombinant Human Alkaline phosphatase, placental type (ALPP) (Active) spans the amino acid sequence from region 23-506aa. Purity: Greater than 95% as determined by SDS-PAGE....                                                                                        |
| Molekulargewicht         | 54.1 kDa                                                                                                                                                                                                                                                                      |
| UniProt                  | <a href="#">P05187</a>                                                                                                                                                                                                                                                        |
| Puffer                   | Lyophilized from a 0.2 µm sterile filtered PBS, 6% Trehalose, pH 7.4                                                                                                                                                                                                          |
| Quelle                   | Homo sapiens (Human)                                                                                                                                                                                                                                                          |
| Reinheit                 | Greater than 95% as determined by SDS-PAGE.                                                                                                                                                                                                                                   |
| Formulierung             | Lyophilized powder                                                                                                                                                                                                                                                            |

|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | <p>Biological Origin: Homo sapiens (Human). Biological Activity: Measured by its binding ability in a functional ELISA. Immobilized Human ALPP at 2 µg/mL can bind Anti-ALPP/ALPG recombinant antibody. The EC50 is 4.478-5.236 ng/mL. Application Notes: We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference</p> |
