| Hersteller               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC, WB                                                                                                                                                                                                                                                       |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Prokaryotic recombinant protein of 31 kD corresponding to the C-terminus of the heat shock protein 105 molecule                                                                                                                                               |
| Produktbeschreibung      | Heat shock protein (HSP) 105 exists as two isoforms, alpha and beta which belong to the HSP105/HSP110 protein family. HSP105 acts as both a chaperone to prevent thermal aggregation of proteins and as a regulator of mammalian cells. The HSP105 isoform... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [r58F12]                                                                                                                                                                                                                                                      |
| Molekulargewicht         | 105kDa                                                                                                                                                                                                                                                        |

|              |                                                                                                                                                                           |
