| Hersteller               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Prokaryotic recombinant protein corresponding to a 251 amino acid region of the C-terminus of the human adenomatous polyposis coli protein                                                                                                                    |
| Produktbeschreibung      | The human adenomatous polyposis coli (APC) gene at locus 5q21 encodes a protein of 2,843 amino acids. The precise function of this 300 kD protein is not clear but it may have several functions including a role in cell proliferation, apoptosis, expres... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [rEMM43]                                                                                                                                                                                                                                                      |
| Molekulargewicht         | 66kDa                                                                                                                                                                                                                                                         |

|              |                                                                                                                                                                           |
