| Alternativnummer         | NBT-3495-RBM9-P0-20                                                                                                                                                                                                                                           |
| Hersteller               | NeoBiotechnologies                                                                                                                                                                                                                                            |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant fragment (around aa1-200) of human IGHD protein (exact sequence is proprietary)                                                                                                                                                                   |
| Produktbeschreibung      | Immunoglobulins are four-chain, Y-shaped, monomeric structures comprised of two identical heavy chains and two identical light chains held together through interchain disulfide bonds. The chains form two domains, the Fab (antigen binding) fragment an... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MSVA-701R]                                                                                                                                                                                                                                                   |
| Molekulargewicht         | 44-80kDa (heavy chain), 21-25kDa (kappa light chain)                                                                                                                                                                                                          |

|              |                                                                                                                                                      |
