| Wirt                     | Human                                                                                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                                |
| Molekulargewicht         | The recombinant human IL25/Fc chimera is a disulfide-linked homodimeric protein. The reduced monomer consists of 403 amino acids and predicts a molecular mass of 45 KDa. As a result of glycosylation, the apparent molecular mass of rh IL25/Fc monomer is ap |
