| Wirt                     | Human                                                                                                                                                                                                                                        |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                             |
| Molekulargewicht         | This protein carries a human IgG1 Fc tag at the C-terminus, followed by an Avi tag (Avitag(TM)).The protein has a calculated MW of 43.3 kDa. The protein migrates as 45-50 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation. |
| Tag                      | Avi&Fcg                                                                                                                                                                                                                                      |
| Quelle                   | Human                                                                                                                                                                                                                                        |
| Reinheit                 | >95% as determined by SDS-PAGE.                                                                                                                                                                                                              |
| Anwendungsbeschreibung   | For Research Use Only. Not intended for any clinical use.                                                                                                                                                                                    |
