| Produktbeschreibung      | Chemokines form a superfamily of secreted proteins involved in immunoregulatory and inflammatory processes. The superfamily is divided into four subfamilies based on the arrangement of the Nterminal cysteine residues of the mature peptide. CCL1, a me... |
| Molekulargewicht         | 35.4 kDa                                                                                                                                                                                                                                                      |
