## Product Datasheet

### **Cynomolgus CD3 epsilon (22-48) Protein, Fc Tag, low endotoxin (MALS verified), Unconjugated, Human ABS-CDE-C5253-100UG**

|                          |                                                                                                                                                                                                                                                               |

| Produktbeschreibung      | The Gln22Thr48 region of Cynomolgus CD3E is a core part of its extracellular immunoglobulinlike (Iglike) domain. Its primary function is to act as a crucial structural scaffold, mediating proper interactions with other CD3 subunits (specifically CD3G... |
| Molekulargewicht         | 29.3 kDa                                                                                                                                                                                                                                                      |
| Tag                      | C-Fc                                                                                                                                                                                                                                                          |
